

Requirements for green tariff obtaining for solar PP

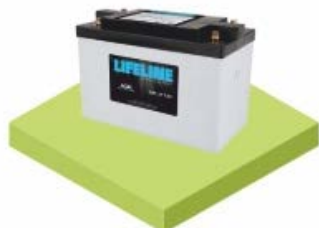

Elements of ukrainian production equipment	Incremental percentage parameter, %
Photoelectric modules	40
Fabricated metals for the photovoltaic modules	15
Prepacked transformer substation PBTS-inverter	15
Energy storage systems	15
Tracking systems	15
In total	100

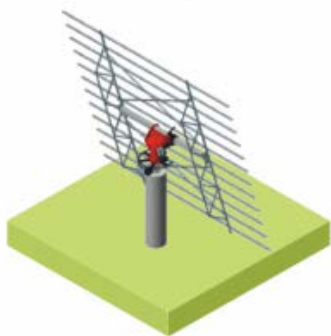

Photoelectric module – electrically connected assemblage of photoelectric modules, which transforms solar radiation energy into electric energy

Prepacked transformer substation PBTS-inverter – power transformer and inverter

Accumulator – device for electric energy accumulation and autonomous power supply of electrical equipment

Tracking system – metallic element capable to follow the sun, on which solar module is fixed
